Java

PERSONAL PROJECTS

Finger Vein Authentication (01/2024 - 03/2024)

- Developed a biometric authentication system using finger vein recognition for enhanced home security.
- Employed pattern recognition techniques to ensure access only for authorized individuals based on unique vein patterns.
- Focused on adaptable solutions to safeguard sensitive residential information, highlighting the effectiveness of finger vein authentication for privacy and security.

Personal Management System (08/2023 - 11/2023)

- Developed a secure Personnel Management System with employee access to personal details.
- Integrated Firebase for data storage, authentication, and real-time updates.
- Implemented encryption techniques to protect sensitive employee data.

E-Commerce Website (03/2023 - 05/2023)

- Developed a responsive e-commerce website for seamless user experience across devices.
- Implemented guest checkout using phone numbers and delivery addresses to enhance user convenience.
- Utilized modern web technologies to build a secure, scalable, and high-performing platform.
